

CHAD NIERENHAUSEN

Full Stack Developer

WORK EXPERIENCE | APPLICATION SYSTEMS ANALYST, PR UNIVERSITY OF ARIZONA – Residence Life

2015 - PRESENT

- Leading the migration of our Production and Development Housing system from on premises to AWS.
- Led Residence Life team working with Systems Administrator, Senior and University Network teams to organize and implement our Virtual Private Cloud in Amazon Web Services with a VPN connection to campus to support current needs and allow for future growth.
- Appointed member of eight-person search committee tasked with hiring the new Assistant Director of Technology Services in Residence Life.
- Direct supervisor for two Student IT Support Technicians. Solely responsible for screening, interviewing, and hiring applicants.

APPLICATION SYSTEMS ANALYST, SR UNIVERSITY OF ARIZONA – Residence Life

2011 - 2015

- Work with team members to research plan and implement the migration of new and legacy systems from on premise datacenters to AWS managed infrastructure.
- Technical Lead of five-person project team tasked with replacing the existing out-of-date student housing system used by Residence Life with [a] new streamlined process developed in conjunction with vendor company StarRez. Supervised the integration of the new housing system with existing campus partners and served as liaison between The University of Arizona and StarRez.
- Write and maintain C# applications used to manage 6,000+ graduate and undergraduate students per year in the University of Arizona housing system.
- Designed and built an innovative self-assign system that allows 6,000+ undergraduate and graduate students to self-select where they want to live on campus. In the Fall 2013 semester, the system was accessed by and able to sustain 2,500 users in the first 15 minutes it was live.
- Worked with the Residence Life Marketing Department to completely redesign and rebuild the Residence Life website. Served as the sole developer in charge of migrating the 25,000 page statically-generated PHP site to a full-featured CMS with a custom theme and over fifteen custom-built widgets.
- Collaborated with the Marketing and Residential Education Departments to design and build a mobile-first responsive website used in the winning bid by the University of Arizona to host the AIMHO 2015 Conference.

WEB DEVELOPER TWINWICKS - Freelance

2012 - PRESENT

- Heavily modified the frontend and administrative interface of the Javo House Wordpress theme to reflect the needs of the Crunkleton Commercial Real Estate Groupⁱ.
- Develop and maintain a custom website for Arizona State Representative Victoria Steele'sⁱⁱ successful 2012 campaign to her first elected position within the Arizona House of Representatives.
- Developed a custom WordPress -based ecommerce site for Tucson-based music publisher BPM Publicationsⁱⁱⁱ.
- Constructed a custom portfolio site for local makeup artist Kelly Estes of Lady Lovely Makeup Artistry^{iv}. The site features a custom-built live Instagram feed using the OAuth 2.0 protocol and Instagram's API.
